ENVIRONMENTAL POLICY

CONTRIBUTE TO SYSTEMATICALLY PROTECTING THE ENVIRONMENT

DijitalPort will develop and increase environmental performance for the benefit of the people and their future. Environmental management is a critical component of business decision making and tries to make ongoing improvements to protect and preserve the environment. DijitalPort's environmental policy is an equivalent and consistent component of the overall corporate politics and strategy.

PREVENTIVE ENVIRONMENTAL PROTECTION

To continuously improve our environmental performance and quality, to contribute to increasing environmental awareness among our employees, suppliers, customers, and society, and to constantly review the goals, it is committed to controlling, reducing, and preventing environmental damage with the goal of not polluting the environment rather than cleaning it.

REDUCING ENVIRONMENTAL IMPACT

To educate our employees and business partners about the environmental impacts of our activities, it is committed to identifying environmental risks and opportunities by integrating the environmental management system into our business processes and strategies, as well as taking measures to reduce and/or eliminate environmental impacts.

LIFE CYCLE

We undertake to determine the necessary environmental conditions in accordance with the life cycle principle in our product-service purchases with significant environmental dimensions.

OBLIGATIONS

Fulfilling all legal obligations and legal obligations arising from contracts, complying with national and international legal regulations and other obligations related to the environment in the geographies where we operate, and communicating and cooperating with relevant institutions and organizations in the development of relevant legal regulations, other requirements, policies and standards, and compliance with environmental management systems.
